

Wall of Art

Contracting & Electromechanical

COMPANY PROFILE

We deliver your electromechanical works with quality and speed

Integrated solutions from design to commissioning and testing

About Us

Your trusted partner in electromechanical works and contracting

Wall of Art began operations in **1439 AH** in Riyadh, with a commercial registration from the Ministry of Commerce, to meet the need for electromechanical works in particular and contracting in general.

We work under the motto “**Quality in execution and speed in delivery**”, through a specialized engineering and technical team and wide relationships with agents and suppliers that ensure supply accuracy, after-sales service and warranty — contributing to Saudi Vision 2030.

Our team comprises qualified engineers and technicians with broad field experience, delivering commercial, residential, industrial and infrastructure projects with full commitment to occupational safety and quality systems.

Saudi Vision 2030

The Kingdom's landmark projects that inspire our ambition

We are proud to be part of the national development journey under Saudi Vision 2030. These are examples of the Kingdom's landmark projects that inspire our ambition for quality and excellence — they belong to their respective owners; we are not their contractors.

Our Values

Our Vision & Mission

Our Vision

To expand our work across all regions of the Kingdom with high quality and efficiency, and to be among the companies contributing to Vision 2030.

Our Mission

To satisfy all our clients by executing works to the highest quality standards and technical specifications, with honest cooperation and commitment to deadlines.

Our credentials & trust factors

UL / FM listed products

Civil Defense compliant

Verified commercial registration

Aligned with Vision 2030

Warranty & after-sales

Our Services

Integrated electromechanical solutions

01

HVAC Systems

Design, supply, installation and commissioning of all AC types: split, central, chillers (air/water-cooled), and air handling units.

02

Fire Fighting & Alarm

Early fire-fighting and alarm systems compliant with Civil Defense, with UL Listed and FM Approved products, and gas suppression (FM200).

03

Electrical & Low-Current

Lighting networks, cabling and panels, CCTV surveillance, access control, communications and low-current systems.

04

Infrastructure Works

Water, sewage and electrical conduits using HDPE and other pipes, coordinated with architectural and structural works.

05

Pump Works

Supply, installation and commissioning of all pump types, and execution of pump rooms and accessories for water and infrastructure projects.

Our Sectors

Sectors we serve with experience and efficiency

Commercial & Office Buildings

Electromechanical works for towers, offices and commercial centers to the highest standards.

Residential Complexes

HVAC, electrical, fire-fighting and pump solutions for villas, compounds and residential units.

Factories & Industrial Facilities

Electrical, mechanical and fire-fighting systems suited to industrial operating environments.

Infrastructure Projects

Water and sewage lines, pump stations and networks for large-scale projects.

Healthcare & Educational Facilities

Precise installations meeting the requirements of hospitals, schools and public facilities.

Government & Semi-Government

Delivering government projects per approved specifications, certifications and schedules.

Our Methodology

1

Design

Preparing all necessary drawings and studying the project by building type and use, with schedules.

2

Supply & Installation

Installations by specialized technicians under engineering supervision, supplying high-quality materials via our network.

3

Commissioning & Testing

Inspecting and testing all devices and systems to ensure quality, then initial and final handover.

Why Us

Quality & speed of delivery

Precise execution within agreed schedules without compromising quality.

Specialized engineering team

Installations by specialized technicians under full engineering supervision.

Globally certified products

Fire systems with UL Listed and FM Approved products, Civil Defense compliant.

Strong agent relationships

A wide network ensuring supply timing accuracy, after-sales service and warranty.
